# Blue Ribbon Orchid Flasks

During the past year we have offered from time to time transplanted 500cc flasks of outstanding crosses. One of the greatest reasons for the success is the new formula we are using when these bottles are transplanted. This results in large, husky seedlings (50 or more) ready for community pots that are very easy to grow. In addition, we furnish complete growing instructions — our time tested method.

## Special Values

We have many fine hybrid crosses with only a small quantity of plants available, too few to put on a listing. Hence, we are offering the following assortments at prices which represent a saving over the regular price.

### Fine Hybrid Blooming Size Plants

1 plant \$8.50    Two \$15.00    Three \$18.75    Four \$23.00    Five \$27.50

May be Cattleyas, Cymbidiums, Miltonias, Odontoglossums all of one genera or any combination of the above genera that you desire.

### Fine Hybrid Seedlings

Five small seedlings of the above genera are offered at \$10.00. These also may be all of one genera or assorted, whichever you prefer.

We will carefully select these plants and they will all be labeled as to name or cross.

## Awarded and Exhibition Type Orchids

In our last two offerings, we listed a number of our fine Exhibition and Stud Plants. Here we are naming some additional plants which were not mentioned previously. We issue a special list of this type of plant from time to time offering divisions when available. If you would like to receive this listing we would be glad to include you on the list of those to whom it is sent.

As a result of certain experiments that we embarked upon some time ago, and from which we are now able to draw certain preliminary conclusions, we are offering our first

## "Cream of the Crop" Seedlings

LH133	<b>SLC Miami 'Red Coat' x SLC Lindores '★ ★ ★'</b> .....	7.50
		Deep red-purple with red splashed petal and sepals crossed with finest red Lindores. Expect fine reds.

These are community pot size seedlings ready for individual pots, but only a very small percentage of seedlings raised will qualify for this category, "Cream of the Crop," since only the huskiest, most vigorous and largest seedlings will be sold. Therefore, the supply available is extremely limited and may not last long. For those who would rather pay more and get the very best. A fine flower seldom attains its peak if the plant lacks vigor of growth.

## Experiments in Genetics

We are offering the following seedlings from the second planting:

- No. 1 LH94 C. Nellie Roberts 'Tyoh' (C. Bow Bells x  
Dowiana Aurea Sheppeys Var.) x self**.....\$2.00 ea.; 6 for \$9.00; 12 for \$15.00  
We expect purples, whites, whites with colored lip and yellows with the fine Bow Bells qualities.
- No. 2 LH75 Potinara Tripoli 'Tyoh' AM-AOS  
(BLC Ishbel x SLC Ramona) x self**.....\$3.00 ea.; 3 for \$6.00; 6 for \$10.00  
Fine salmon red flower, very vigorous, blooms more than once a year. Good form and substance.

And are asking that if possible you join us in these two experiments. Several hundred people are now taking part and we are going to compile and publish the results as they become available. The purpose is to further the knowledge of the laws of inheritance in Orchids. And we will be glad to give you further details if you would like to join all of us in what we consider a worthwhile project. We fully expect that some seedlings from the first planting will bloom in 1961. This may be the last offering of these community pot seedlings ready for individual pots. You may purchase seedlings without joining in the experiment. Our next experiment will be:

- No. 3 C Bow Bells 'Snowy River' AM-AOS x C Nellie Roberts 'Tyoh'**

If you would like to know more about this latest experiment drop us a postcard.
